

ART/CRAFT: MAKE YOUR OWN SNAKE SLINKY

You will need:

1 x Paper plate
1 x Small piece of coloured paper
Googly eyes

Scissors
Pencils, paint or crayons
Glue

1. Decorate your paper plate. Create a scale pattern by painting onto a piece of bubble-wrap and pressing the wrap paint-side down onto your plate. Or get creative and decorate how you like!

2. Draw a spiral onto your paper plate, starting from the centre, winding all the way to the edge.

3. Cut along the spiral lines you've drawn. You will end up with one long spiral.

4. Paste on some googly eyes and a tongue and you're finished!

ART/CRAFT: SNAKE NATURE COLLAGE

Head outdoors and have the students collect a range of natural items like sticks, leaves and seeds. Be careful not to pick anything living or disturb any habitat. Have the students arrange their finds into the lying down S shape of a snake.

Find nature treasures for the eyes and mouth for bonus design points!

ART/CRAFT: MAKE YOUR OWN PAPER-CUT PORTRAIT

Collage is a fun, creative way to create art. Have your students explore their skills in collage and create a portrait of themselves.

There are no rules in collage, everything is an experiment! However, we've listed a few techniques and materials to start you on your collage journey.

Collage Material Ideas

- Coloured paper
- Magazines
- Newspaper
- Fabric/ribbon scraps
- Tissue paper
- Sequins
- Foil
- Buttons
- Tinsel
- String/yarn
- Bubblewrap
- Pipe cleaners
- Pasta/rice
- Glitter
- Feathers
- Cotton wool
- Pom poms
- or anything else that will stick to your paper!

Techniques

- Cutting
- Tearing
- Painting
- Colouring
- Stamping (similar to how the bubblewrap was used in the snake-slinky activity)
- Weaving

SENSATIONAL SNAKE COLOURING SHEET

DOING: SNAKE-SPOTTING WORKSHEET

Using the space provided, draw each snake in the positions stated.
Describe what a human should do if they see these behaviours.

Sunbathing snake

What should you do if you see a snake in this position?

S-shape snake

What should you do if you see a snake in this position?

Slithering away snake

What should you do if you see a snake in this position?

DOING: NATURE GOGGLES

Practise making your nature goggles. Wear them and look out the window of your classroom for one minute. Once the time is up, write down all the animals and insects you spotted.

1.	7.
2.	8.
3.	9.
4.	10.
5.	11.
6.	12.

DOING: PRACTISE FIRST AID

Practise applying a compression bandage, as described at the end of Snakes Awake.
